

Play-Doh Letter Formation Mat

Use play-doh to practice shaping letter formation.

A large rectangular mat with a solid top line, a dashed middle line, and a solid bottom line. On the left side, there are two black circular starting points. The top one is for the lowercase letter 'b', and the bottom one is for the uppercase letter 'B'. A large number '2' is positioned to the left of the 'B' starting point. Each letter is shown in a large, hollow outline. For the 'b', a grey arrow starts at the top dot, goes down, then curves right and loops up to form the bowl. For the 'B', a grey arrow starts at the bottom dot, goes down, then curves right and loops up to form the top hump, and another arrow shows the second hump. A horizontal grey arrow with a dashed line above it indicates the writing path for the stems of both letters.
